

VENT EAVES COMB FILLER

G1275

DESCRIPTION

The VENT Eaves Comb Filler G1275 is designed with flexible fingers which adjust to fill the gaps left when using profiled tiles or steel roof cladding. This prevents entry by birds and large insects beneath the tiles.

FEATURES

- More cost-effective than using purpose made profiled fillers.
- Allows free-flow of air into the roof cavity, reducing the risk of moisture build up.
- Profiles to the underside of the roof covering.
- 1m lengths for ease of installation.
- Prevents ingress of nesting birds.

SCOPE OF USE

- Commercial and residential application.
- Suitable for use on all roof types.

WARRANTY

- 15 Years

MAINTENANCE

- No maintenance requirements.

CONDITIONS & LIMITATIONS

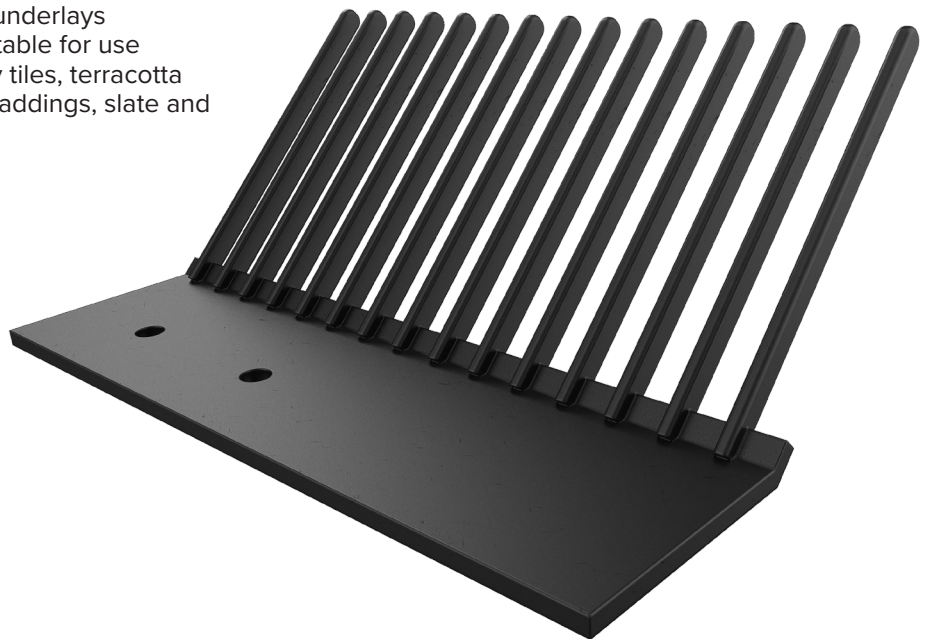

- G1275 Eaves Comb Filler must be installed in accordance with product installation guide
- G1275 Eaves Comb Filler can installed on both timber or steel roof and wall framing
- G1275 Eaves Comb Filler are suitable for use with any synthetic or bitumen based underlays
- G1275 Eaves Comb Filler are suitable for use under, but not limited to masonry tiles, terracotta tiles, metal tiles, profiled metal claddings, slate and composite claddings

STORAGE

- Handling and storage of VENT Roof Ventilation Products, whether on-site or off-site, is under control of the building contractor. Roof ventilation products must be protected from direct sunlight and physical damage, and should be stored flat and under cover

Weight	4g per box
Material	Polythylene
Manufacturing Process	Injection moulded

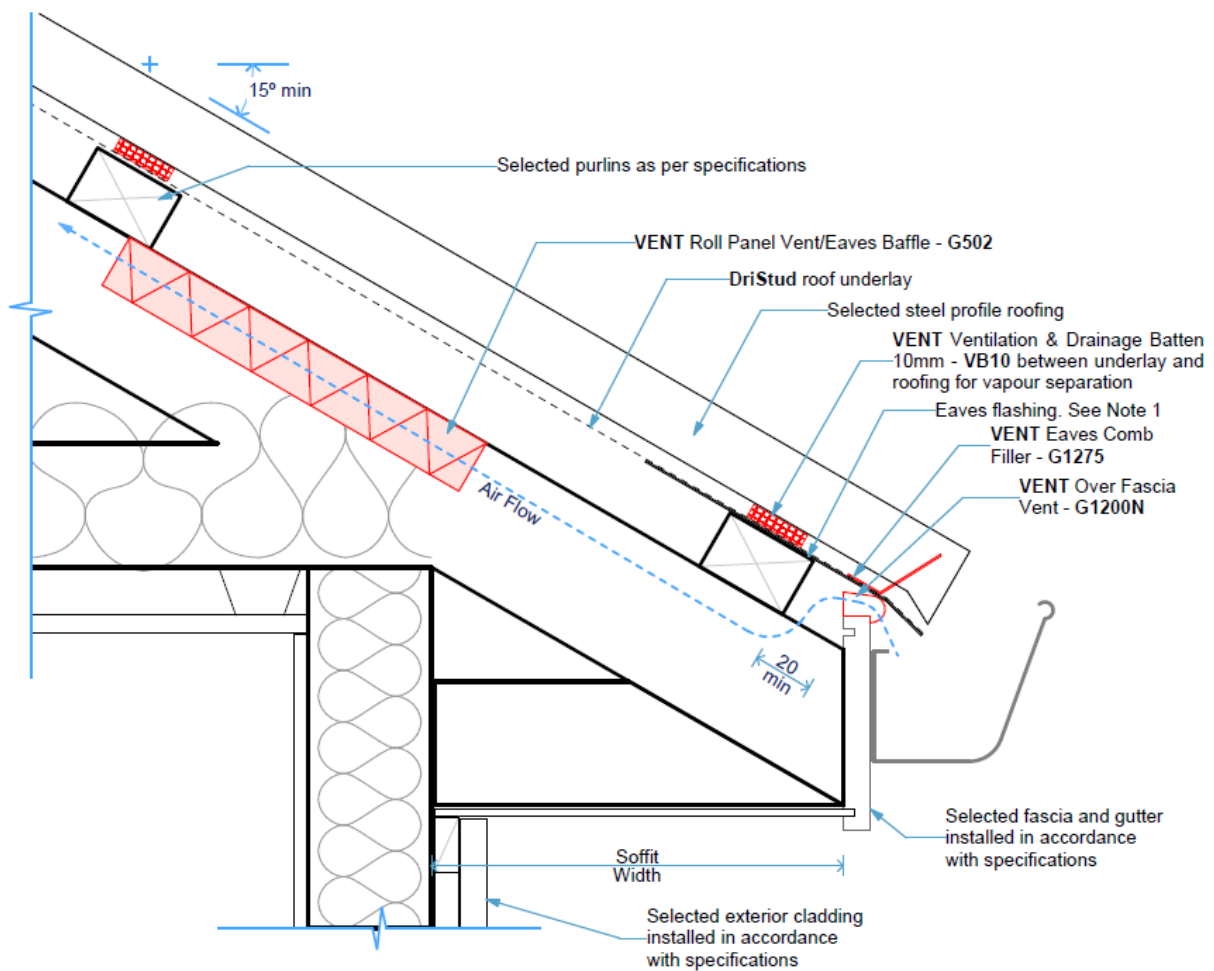

VENT EAVES COMB FILLER

G1275

INSTALLATION

1. The G1275 Eaves Comb Filler should be nailed or screwed to the top of the fascia board or over-fascia vent through the fixing holes provided along the full length of the eaves and joined where necessary.
2. It can be fixed over a paper support tray if required.
3. Confirm with fascia manufacturers correct screw fixings to ensure fascia warranties are upheld.
4. For metal fascias, armagalve screws are recommended.
5. The G1275 Eaves Comb Filler should not be exposed to direct sunlight for more than 30 days.
